

Ethical Approval for the use of animals in research and teaching in schools and early childhood centres

This website gives educators legal, ethical and practical information on the use of small animals for research and teaching in early childhood education centres and schools. Retrospective approval cannot be given.

The Aurora Energy Science and Technology Fair will not accept projects that do not have approval from Animal Ethics Committees. Projects that have Animal Ethics will need to comment on their display boards what and why Animal Ethics was needed.

For forms and more information go to: <https://animaethics.org.nz/>
