

HEALTH, SAFETY AND ENVIRONMENT

Our commitment to you

Aurora Energy puts your safety first. We want all our customers, employees, contractors and the wider community to be safe around electricity.

At Aurora Energy, we care for our people, our contracting partners, our communities, and the environments our assets are threaded through.

We are committed to providing a safe working environment and will do what is necessary to protect all the people who operate within it.

We believe that safety is everybody's responsibility and that our leaders both influence and set the tone for wider safe behaviours at work and in the community.

We actively seek to build a positive culture that places safety at the forefront of all that we do while recognising we must always strive to improve.

We believe that all incidents are preventable.

We believe that anyone can stop an unsafe act and all our people and contractors are empowered to manage and control all the hazards and safety risks they see. We expect our people to take a lead in this.

We believe that everyone has the right to come to work with the expectation that they will return home safe and healthy, every day.

We know we can achieve excellence in the management of health and safety, emergency

management, employee wellness and rehabilitation.

We will achieve all our aspirations by always improving the way we work, the tools we provide, how we coach and train all our people and actively encourage all our people to get involved in health and safety in Aurora Energy and with our partners

We will comply with all legislative requirements, recognised standards, codes of practice and safe operating procedures.

We are committed to maintaining and improving the physical safety of all assets on the Aurora network and to educate the community on how they can stay safe around electricity.

We will support our people to take these commitments to health and safety beyond our work environment and support the wider community.

More information on keeping safe around electricity can be found online at www.auroraenergy.co.nz or on request.
